

# WILL THE REGULATION OF AI LIMIT INNOVATION?

## VIDEO TRANSCRIPT

**Speaker 1 [00:00:05]** There are some people who are concerned that regulation might stifle innovation. But I don't think that it needs to be that way. Consider the following analogy. If you build a fence at the edge of a cliff, people can go right up to the fence and they can look over it. But if there's no fence, then people have to stand well back from the edge. So regulation is a little bit like the fence for AI. Having regulation or strong guidelines, let companies know just how far they can push their innovation rather than perhaps holding back out of uncertainty.
